DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 5,7 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Landry (6,732,301).

As to claim 5, Landry discloses an electronic device configured to be connected by a serial bus including a signal line, comprising:

a signal receiving unit configured to receive signals off a standard for the serial bus from the signal line (column 3, lines 20-24); and

an identification unit connected to the signal receiving unit and configured to identify the received signals (column 3, lines 42-43),

wherein a self-test is performed based on results of the identification (column 3, lines 1-4).

As to claim 7, Landry discloses an electronic device as claimed in claim 5, wherein the serial bus is a USB (Figure 1.124, column 3, lines 1-2).

As to claim 10, Landry discloses an testing device for transmitting test command signals to an electronic device connected with the testing device by a serial bus including a signal line, said testing device transmitting signals off a standard of the serial bus as said test command signals to the electronic device through the signal line (column 3, lines 12-13 & column 4, lines 31-37).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Landry taken in view of Korhonen (6,829,726).

Application/Control Number: 10/601,663 Page 4

Art Unit: 2113

As to claim 8, Landry discloses a USB test tool for testing a digital system (column 3, lines 1-5). Landry fails to disclose wherein the electronic device further comprises a display for displaying results of the self-test.

Korhonen discloses a test device that interacts with a computer through the USB port (Abstract, lines 4-8). Korhonen does disclose wherein the electronic device further comprises a display for displaying results of the self-test (column 3,lines 65-67).

It would have been obvious to one of ordinary skill in this art at the time of invention by applicant to implement Korhonen display with Landry's USB test tool. A person of ordinary skill would have been motivated to make the modification because the results are only useful if they are displayed and Korhonen discloses a means to do this.

Allowable Subject Matter

Claims 1-4 and 9 are allowed.

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Application/Control Number: 10/601,663 Page 5

Art Unit: 2113

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Ehne whose telephone number is (571)-272-2471. The examiner can normally be reached on Monday-Friday 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Beausoliel can be reached on (571)-272-3645. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
